Crosswater Clear Treated Glass

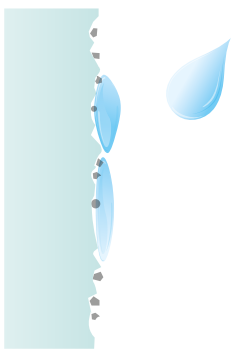

Untreated Glass

The Ultimate Glass Protection

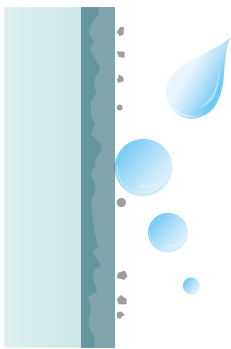

Supplied as standard.

Crosswater Clear is a colourless surface treatment applied to all shower and bath panels. The coating is perfectly flat and invisible and works by creating a surface that helps prevent limescale, soap/shampoo build-up, easier to clean and sparkling glass every day.

Untreated Glass

Untreated glass can quickly and easily suffer permanent bonding of limescale and mineral salts onto its surface, which can cause staining and damage, with water spots being difficult, if not impossible, to remove despite regular cleaning.

Crosswater Clear Treated Glass

Helping to prevent build up and making the glass easier to clean, Crosswater Clear allows soils and liquids to 'slide off' the treated surface which prevents limescale and other dirt from building up to make cleaning a quicker and easier process.

GALLERY 10

Expertly curated, our luxury GALLERY 10 collection offers 10mm toughened safety glass, profiles and stabilising options in an assortment of indulgent colours with diverse layout options, giving you complete design flexibility to create your personalised showering solution.

The GALLERY 10 range is suitable for either a shower tray or tiled floor installation.

Deflectors

If you've decided to opt for a configuration with a deflector we have 2 options to choose from - 180° hinged or fixed. Each type requires different fittings, details of these are listed below.

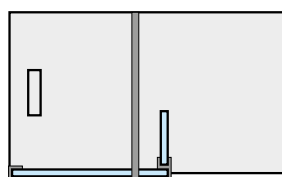

We wouldn't recommend installing a deflector panel if you have chosen a glass to ceiling bracing bar.

180° Hinged Deflector Panel

Available in 300mm, our hinged panel rotates through 180° for easier access. The colour matching hinges and clear seal give your walk in a seamless appearance.

- 1 x Glass Panel for Hinged Deflector
- 1 x Deflector Panel 180° Hinges (pair)

Fixed Deflector Panel

Available in 300mm or 400mm, for spaces where you prefer the panel not to move. The colour matching glass to glass brackets and clear seal give a luxury appearance.

- 1 x Glass Panel (up to 400mm max.)
- 1 x Glass to Glass Brackets (pair)
- 1 x Glass to Glass Seal

Additional Design Flexibility

The configurations shown are the most typical options; if you require something different please talk to your local bathroom specialist.

GALLERY 10 Personalising Your Space

Consider Your Stabilising Fixings

To enable you to create your personalised showering space we have a range of stabilising fixings available. In all cases you should ensure a secure fixing. We do not recommend fixing to plasterboard alone, please consult your local installer for guidance.

Glass to Wall Bracing Bar

1200mm long. Can support panels up to 1400mm.

Glass to Ceiling Bracing Bar

600mm long. Can support panels up to 1000mm.

Angled Glass to Wall Bracing Bar

941mm long. Can support panels up to 1000mm.

T Bracing Bar

1200 x 1200mm. Can support panels up to 1000mm.

Wall Profile with 15mm Adjustment

Can support panels up to 500mm without a bracing bar.

Glass to Glass Corner Seal

For joining two fixed glass panels.

Not sure what you need?

Depending on the configuration you select you may need to use a combination of stabilising fixings. If you need further guidance please visit crosswater.co.uk or speak to your local installer.

Reduce Splashing

Add on a 180° hinged or fixed deflector panel to create a personalised shower space with extra splash protection; giving the pleasure and luxury appearance of a walk-in shower in even the most modest of bathroom spaces.

180° Hinged Deflector Panels

Just as they sound a hinged deflector panel allows the glass to move, enabling greater access to the shower area then protect against over-spray when the water is running.

Fixed Deflector Panels

Fixed deflector panels offer the same design flexibility particularly in smaller spaces. These can be installed using our glass to glass brackets and a glass panel up to 400mm.

Choose Your Perfect Shower Base

Our Gallery 10 Walk In collection can be installed with a shower tray or in a full wet room for full design freedom.

KAI 6

Unrivalled engineering, design and outstanding value for money are the underlying characteristics of KAI 6.

Gently contoured silver anodised aluminium profiles with 6mm toughened glass offer plenty of adjustment for out of square walls.

A broad choice of door opening styles and sizes make KAI 6 ideal for smaller bathrooms where form and function are of equal importance.

Product Guidelines

Product Compatibility

While the majority of Crosswater products are compatible, please take care when selecting products before ordering to avoid installation issues.

Trays must be plumbed and level, walls should be tiled down to the tray and sealed before doors or frames are fitted.

Dimensions are designed for tiled in trays, not unfitted tray sizes.

All doors and enclosures must be fitted to a tiled surface, not tiled up to the inside edge of the door.

Enclosures must not be completely sealed on the inside.

Due to the weight of the shower doors, you must ensure that the walls to which they are fixed are of suitable construction to support the enclosure.

Due to the nature of wetroom/walk in panel products, water integrity cannot be guaranteed. Please consult your installer.

All heights printed for shower doors and bath screens are from the top of the shower tray or bath.

Installation

Products must be installed according to our installation instructions, please visit www.crosswater.co.uk for full details.

Cleaning

To maintain the look and performance of your Crosswater shower enclosure, you should:

- Remove any residual water after every use.
- Wipe clean the frame and glass elements with a soft, non-abrasive, colourfast cloth after every use.
- Never use an abrasive cloth or scouring pad which could damage the product.
- Clean the glass gently with warm soapy water and never use any aggressive fluids or strong household cleaning agents which could damage the product.
- Not allow limescale to build-up on any element, particularly in harder water areas.

Quality

All Crosswater showering products are CE / UKCA marked and are manufactured to the following standards:

- BS EN 14428:2015 + A1:2018 for shower enclosures.
- BS EN 12150 for toughened glass.
- BS EN 14527 for shower trays.

Clear 6 Patents

To provide the very best performing and safest shower doors using the latest materials technology several European patents have been approved for Clear 6. Details of these if required can be applied for by calling our technical department.

Lifetime Guarantee

The Crosswater Lifetime guarantee is subject to online registration and represents the perceived lifetime of the product, which is 25 years.

To register and activate your guarantee or for full details of all Crosswater guarantees, please visit www.crosswater.co.uk

Shower doors and bath screens, excluding display installs:

- Glass breaks within 6 months of installation product replaced and costs for refitting are reimbursed by Crosswater
- Glass breaks within 6-24 months of installation product is replaced but no fitting costs reimbursed
- Glass breaks 24+ months of installation a 10% discount against a replacement product
- General wear and tear to any of the above items would be considered a specific exclusion

Crosswater guarantees do not affect your statutory rights.
